

## ***Security policy***

O.W. Tankers A/S recognizes the paramount importance of securing and protecting, both at sea and ashore, its personnel, the environment and property owned by or in the custody of the Company.

O.W. Tankers A/S will always endeavour to avoid situations where its personnel, the environment or property owned by or in the custody of the Company will be exposed to acts which threaten the security of the aforesaid parties.

In order to achieve this aim the Company will encourage and support its personnel to show vigilance in all aspects of their daily work and duties.

All Security Plans onboard vessels operated by O.W. Tankers A/S are made to ensure that all security related risks are identified and properly handled by means of appropriate measures laid down either in the International Ship and Port Facility (ISPS)-code or this Ship Security Plan in cooperation with the pertinent authorities.

We practice a "non blame" culture and we aim towards the highest degree of security; with 0 (zero) non conformities towards the security plans. We urge the staff to report any deficiency regarding security that would provide the company with a possibility to develop and raise the level of security and understanding of same.
